

## Alcohol Literacy Challenge™ Training Pre-Test

- 1) Alcohol Expectancies are:
  - a. The beliefs people have about what happens when they drink
  - b. Knowledge of the physical effects drinking has on the body
  - c. The legal consequences of drinking
  - d. All of the above
  
- 2) Alcohol Expectancies:
  - a. Can be both positive and negative
  - b. Influences when a person starts drinking
  - c. Influences how much a person drinks
  - d. Influences how a person behaves when drinking
  - e. All of the above
  
- 3) True or False: Alcohol Expectancies research has found that students who are told they are being served alcohol, but were really served non-alcoholic drinks, were judged by their peers to act “wilder” at parties than students who were served alcohol.
  - a. True
  - b. False
  
- 4) What are the odds that students at a party who were served only alcohol or only nonalcoholic drinks all night could tell what they were drinking?
  - a. 100% sure what they were being served
  - b. 75% could correctly identify what they were drinking
  - c. 50% chance students know the difference
  - d. only 25% could tell what they were served
  
- 5) The Expectancy Effects of drinking alcohol are BEST described as including:
  - a. Social & Emotional Effects
  - b. Physical & Mental Effects
  - c. Empathetic & Intuitive Effects
  - d. Biological & Chemical Effects
  
- 6) At what blood alcohol content level does a person begin to feel more depressed and less euphoric?
  - a. .01%
  - b. .05%
  - c. .1%
  - d. .2%
  
- 7) How many standard drinks does it take for a 150 lb. male to have a BAC of .05?
  - a. 1
  - b. 2
  - c. 3
  - d. 4
  
- 8) How much is a standard drink hard liquor, such as most kinds of vodka, rum, whisky or tequila?
  - a. .5 ounce
  - b. 1 ounce
  - c. 1.5 ounces
  - d. 2 ounces
  
- 9) True or false: Ads for both alcohol and bottled water promise the same thing happens to people who drink those products.
  - a. True
  - b. False
  
- 10) Alcohol companies spend how much on advertising each year in America?
  - a. \$5 Million
  - b. \$50 Million
  - c. \$500 Million
  - d. \$5 Billion

## Alcohol Literacy Challenge™ Training **Post-Test**

  - c. \$500 Million
  - d. \$5 Billion

## Alcohol Literacy Challenge™ Training Key

1) Alcohol Expectancies are:

- a. The beliefs people have about what happens when they drink
- b. Knowledge of the physical effects drinking has on the body
- c. The legal consequences of drinking
- d. All of the above

2) Alcohol Expectancies:

- a. Can be both positive and negative
- b. Influences when a person starts drinking
- c. Influences how much a person drinks
- d. Influences how a person behaves when drinking
- e. All of the above

3) True or False: Alcohol Expectancies research has found that students who are told they are being served alcohol, but were really served non-alcoholic drinks, were judged by their peers to act “wilder” at parties than students who were served alcohol.

- a. True
- b. False

4) What are the odds that students at a party who were served only alcohol or only nonalcoholic drinks all night could tell what they were drinking?

- a. 100% sure what they were being served
- b. 75% could correctly identify what they were drinking
- c. 50% chance students know the difference
- d. only 25% could tell what they were served

5) The Expectancy Effects of drinking alcohol are BEST described as including:

- a. Social & Emotional Effects
- b. Physical & Mental Effects
- c. Empathetic & Intuitive Effects
- d. Biological & Chemical Effects

6) At what blood alcohol content level does a person begin to feel more depressed and less euphoric?

- a. .01%
- b. .05%
- c. .1%
- d. .2%

7) How many standard drinks does it take for a 150 lb. male to have a BAC of .05?

- a. 1
- b. 2
- c. 3
- d. 4

8) How much is a standard drink hard liquor, such as most kinds of vodka, rum, whisky or tequila?

- a. .5 ounce
- b. 1 ounce
- c. 1.5 ounces
- d. 2 ounces

9) True or false: Ads for both alcohol and bottled water promise the same thing happens to people who drink those products.

- a. True
- b. False

10) Alcohol companies spend how much on advertising each year in America?

- a. \$5 Million
- b. \$50 Million
- c. \$500 Million
- d. \$5 Billion
